Yamada Kami, Suita-shi
Osaka, Japan

Journal of Fermentation Technology, 1977
Contents of Vol. 55

Originals

Tetraploid Formation through the Conversion of the Mating-type Alleles by the Action of Homothallic Genes in the Diploid Cells of *Saccharomyces* Yeasts
..... I. Takano, T. Oshima, S. Harashima, and Y. Oshima...(1)

Production of D-Amino Acid Oxidase by *Candida tropicalis*
.....S. Kawamoto, M. Kobayashi, A. Tanaka, and S. Fukui...(13)

Purification and Properties of Galactokinase from *Bifidobacterium bifidum*
..... L. Lee, A. Kimura, and T. Tochikura...(19)

Comparative Study of Methionine Effect on Cephalosporin Production by Various Fungi
..... K. Kitano, K. Kintaka, and Y. Nakao...(27)

Accumulation of the Open-ring Acid of Spiculisporic Acid by *Penicillium spiculisporum* in Shake Culture
..... T. Tabuchi, I. Nakamura, and T. Kobayashi...(37)

Factors Affecting the Production of the Open-ring Acid of Spiculisporic Acid by *Penicillium spiculisporum*
..... T. Tabuchi, I. Nakamura, E. Higashi, and H. Kobayashi...(43)

An Attempt of Medium Optimization on Biomass Production from the Nopal Fruit
.....A. Ornelas-Vale, E. Camargo-Rubio, and S. Nagai...(50)

Energetic Balance and Cellular Composition of *Candida utilis* in Sugar-limited Chemostat Cultures Based on Nopal Fruit
..... E. Camargo-Rubio, A. Ornelas-Vale, G. Casarrubias-Arcos, and S. Nagai...(56)

Inactivation of Hexokinase and Glucose-6-phosphate Dehydrogenase during Immobilization by Polyacrylamide Gel Entrapping
..... K. Miyamoto, M. Ohyabu, M. Okazaki, and Y. Miura...(63)

Immobilization of Invertase by the Use of Photo-crosslinkable Resin Oligomers and Properties of the Immobilized Enzyme
..... A. Tanaka, S. Yasuhara, and S. Fukui...(71)

Oxygen Transfer in Hydrocarbon Fermentation by *Candida rugosa*
.....T. Yoshida, K. Yokoyama, K. C. Chen, T. Sunouchi, and H. Taguchi...(76)

Bacterial Degradation of Water-insoluble Polymer (Polypropylene Glycol)
..... F. Kawai, K. Hanada, Y. Tani, and K. Ogata...(89)

Utilization of Phthalic Acid and Iso- and Tere-phthalic Acids by Soil Bacteria
.....T. Harada and S. Koiwa...(97)

Filamentation in *Bacillus cereus* during β-Amylase Production
..... R. Shinke, Y. Kunimi, K. Aoki, and H. Nishira...(103)

Relationship between β-Amylase Production and Sporulation in *Bacillus cereus*
..... R. Shinke, Y. Kunimi, K. Aoki, and H. Nishira...(110)

The Effect of Hemicellulolytic Enzymes on Mesophilic Methane Fermentation
..... S. Oi, Y. Matsui, M. Iizuka, and T. Yamamoto...(114)

Pyrophosphorylase Activities towards Nucleoside Diphosphate Sugars in *Bifidobacterium bifidum*
..... T. Tochikura, L. ja Lee, and A. Kimura...(122)

The Enzyme Catalyzing Uridine Diphosphate Glucose and Uridine Diphosphate Galactose Pyrophosphorolysis in *Bifidobacterium bifidum*
..... L. ja Lee, A. Kimura, and T. Tochikura...(130)

Purification and Properties of Cellulases from *Pellicularia filamentosa*
.....M. Tanaka, S. Takenawa, R. Matsuno, and T. Kamikubo...(137)

Temperature Dependent Hysteresis Oscillations in the Gluconic Acid Fermentation System
.....R. D. Tanner and J. M. Yunker...(143)

A Fed-batch Culture of Methanol-utilizing Bacteria with pH Stat
..... N. Nishio, Y. Tsuchiya, M. Hayashi, and S. Nagai...(151)

Semi-batch Culture of Microorganisms with Constant Feed of Substrate
(A Mathematical Simulation)
..... T. Yamané and S. Hirano...(156)

Effect of Viscosity on Backflow Coefficient and Oxygen Transfer Rate in a Multistage Tower Fermentor
..... J. Páca, and V. Grégr...(166)

Bacterial Flocculation Using Sodium Bentonite as Aid Agent
..... M. Casey, Y. Maeda, and A. Fazeli...(174)

Bacterial Flocculation with Sodium Bentonite
..... I. Alemzadeh, Y. Maeda, and A. Fazeli...(181)

Requirements of PO_4^{3-}, NO_3^-, SO_4^{2-}, K^+, and Ca^{2+} for the Growth of Tobacco Cells in Suspension Culture
..... A. Kato, A. Fukasawa, Y. Shimizu, Y. Soh, and S. Nagai...(207)

Growth and Metabolic Activity of *Klebsiella aerogenes* in a Chemostat Culture
..... J. Páca and V. Grégr...(213)

Conversion of L-Glutamic Acid Fermentation to *N*-Acetyl-L-Glutamine Fermentation by *Corynebacterium glutamicum*
..... T. Nakanishi, Y. Taketsugu, and J. Nakajima...(224)

Effect of Several Substrate-feeding Modes on Production of Extracellular β-Amylase by Fed-batch Culture of *Bacillus megaterium*
..... T. Yamané and M. Tsukano...(233)

A Rapid Method for Estimation of BOD by Using Immobilized Microbial Cells
..... I. Karube, S. Mitsuda, T. Matsunaga, and S. Suzuki...(243)

Treatability of Dyeing Waste-water by a Combined Chemical Coagulation and Activated Sludge Process
..... H. Shirazi, Y. Maeda, A. Mirzadeh, M. Djadali, and A. Fazeli...(249)

Effects of Sodium Bentonite and Ferric Chloride on Activated Sludge Treatment of Waste-water
..... A. Mirzadeh, Y. Maeda, and A. Fazeli...(259)

Studies on Treatment of Carbohydrate Waste-water by Contact Biooxidation Using a Fixed Bed
.....Y. Maeda, A. Boongorsrang, Y. Mizobuchi, T. Waki, K. Suga, and K. Ichikawa...(265)

Photosynthetic Bacteria in Waste Treatment
—Pure Culture Studies with *Rhodopseudomonas capsulata*—
..... H. Sawada, and P. L. Rogers...(297)

Photosynthetic Bacteria in Waste Treatment
—Mixed Culture Studies with *Rhodopseudomonas capsulata*—
..... H. Sawada, and P. L. Rogers...(311)

Photosynthetic Bacteria in Waste Treatment
—Role of *Rhodopseudomonas capsulata* with Agricultural/Industrial Effluents—
..... H. Sawada, R. C. Parr, and P. L. Rogers...(326)

Purification and Some Properties of an Extracellular 3β-Hydroxysteroid Oxidase Produced by *Corynebacterium cholesterolicum*
..... Y. Shirokane, K. Nakamura, and K. Mizusawa...(337)

Fermentative Production of Deltamycin and Deacyldeltamycin
.....K. Okamura, A. Koki, Y. Mutoh, Y. Shimauchi, and T. Ishikura...(347)

Fermentative Production of Citric Acid from *n*-Paraffins by Yeast
.....T. Furukawa, T. Matsuyoshi, Y. Minoda, and K. Yamada...(356)

Effect of Oxygen Supply on L-Valine Fermentation
..... K. Akashi, H. Shibai, and Y. Hirose...(364)

Growth Yields of *Chlorella regularis* in Dark-heterotrophic Continuous Cultures Using Acetate
..... H. Endo, H. Hosoya, and T. Koibuchi...(369)

Semi-batch Culture of Microorganisms with Constant Feed of Substrate
—An Experimental Study—
..... T. Yamané, and S. Hirano...(380)

A Correlation for Flow Rate of Gas Entrained from Free Liquid Surface of Aerated Stirred Tank
.....M. Matsumura, H. Masunaga, and J. Kobayashi...(388)

Wild Yeast Population in Fresh Grape Musts of Different Harvest Times
..... S. Goto, and I. Yokotsuka...(417)

Distribution of Actinoplanetes in Soils of Japan
..... H. Nonomura and S. Takagi...(423)

Identification of Polyethylene Glycols (PEGs)-assimilable Bacteria and Culture Characteristics of PEG 6000 Degradation by a Mixed Culture
..... F. Kawai, M. Fukaya, Y. Tani, and K. Ogata...(429)

Isolation and Characterization of a Methanol-utilizing Bacterium *Pseudomonas putida* Strain 981
..... S. Yamada, K. Nabe, M. Wada, and I. Chibata...(436)

Amino Acid Formation by Methanol-utilizing Bacteria
..... K. Ogata, Y. Izumi, M. Kawamori, Y. Asano, and Y. Tani...(444)

Formation of Valine and Leucine by Analog-resistant Mutants of an Obligate Methylotroph, *Methylomonas aminofaciens*
..... Y. Izumi, Y. Asano, Y. Tani, and K. Ogata...(452)

Identification of a New Methanol-utilizing Bacterium and Its Characteristic Responses to Some Chemicals
.....M. Suzuki, I. Kühn, A. Berglund, Å. Unden, and G.-G. Heden...(459)

Aromatic Amino Acids Production by Analogue-resistant Mutants of *Methylomonas methanolophila* 6R
.....M. Suzuki, A. Berglund, Å. Unden, and C.-G. Heden...(466)

Three Distinct Forms of Arylsulfatases Produced by *Aspergillus* Fungi
..... K. Ohtsuki, Y. Sakurai, and H. Shiota...(476)

Purification and Some Properties of a Bacteriolytic Enzyme Produced by *Bacillus* sp. ML-208
.....M. Tobiishi, T. Yoshimoto, and D. Tsuru...(485)

Preparation and Properties of Naringinase Immobilized by Ionic Binding to DEAE-Sephadex
..... M. Ono, T. Tosa, and I. Chibata...(493)

Preparation of UDP-Glucuronic Acid by Bacterial UDP-Glucose Dehydrogenase
..... Y. Tazuke, Y. Tsukada, and T. Sugimori...(501)

Isolation and Characterization of Proteins from Juices, Musts, and Wines from Japanese Grapes
..... K. Yokotsuka, M. Yoshii, T. Aihara, and T. Kushida...(510)

Continuous Enzymatic Production of Invert Sugar
...H. Goldstein, P. W. Barry, A. B. Rizzuto, K. Venkatasubramanian, and W. R. Vieth...(516)

Measurement of Bubble Diameters in Gas-sparged Agitated Vessels by Small Electrode Probe
.....H. Kataoka, K. Sugaya, S. Mukataka, and J. Takahashi...(525)

Mass Transfer in the Liquid Phase with Tubular Waste-water Treatment Contactor
..... K. Fujie, T. Sekizawa, and H. Kubota...(532)

Occurrence in *Alcaligenes* MC11 of a NAD-dependent Dehydrogenase with High Specificity towards Ether-Alcohol Compounds
..... T. Harada and Y. Sawada...(553)

A *Streptomyces* sp. Effective for Conversion of Cyanide into Thiocyanate
..... S. Oi and T. Yamamoto...(560)

Affinity Chromatography of *Lactobacillus* Phosphofructokinase on Blue Dextran-Sepharose
..... K. Kawai and Y. Eguchi...(570)

Immobilization and Properties of β-Galactosidases from *Macrophomina phaseoli* and *Sclerotium tuliparum*
..... M. Sugiura, M. Suzuki, and M. Sasaki...(575)

Kinetics of *Torulopsis ernobii* Growing on Methanol
..... H. Elmayergi and O. Coffaro D. ...(581)

A Simple Optimization Technique for Fed-batch Culture
..... T. Yamané, T. Kume, E. Sada, and T. Takamatsu...(587)

Experience in the Use of Culture Fluorescence for Monitoring Fermentations
..... D. L. Ristroph, C. M. Watteeuw, W. B. Armiger, and A. E. Humphrey...(599)

Continuous Biomass Production from Methanol by *Methylomonas clara*
.....U. Faust, P. Präve, and D. A. Sukatsch...(609)

Formation of Dimethylnitrosamine in Polluted Environments and the Role of Photosynthetic Bacteria
..... M. Kobayashi, N. Taketomo, and T. Y. Tchan...(615)

A Survey of Activated Sludge Systems in Tehran
..... Y. Maeda, D. Shadafza, M. Djadali, and A. Fazeli...(621)

Notes

Spectral Properties of Cytochromes in *Candida lipolytica* Mitochondria
.....K. Mitsushima, A. Shinmyo, and T. Enatsu...(84)

High Lysine Excreting Mutants of *Saccharomyces cerevisiae*
..... C. G. Haidaris and J. K. Bhattacharjee...(189)

Induction of High Amyloglucosidase-producing Mutant from *Aspergillus awamori*
..... Y. K. Park and M. S. S. de Santi...(193)

L-Malic Acid Production from Non-sugar Carbon Sources by *Paecilomyces varioti*
..... S. Takao, M. Tanida, and H. Kuwabara...(196)

Production of Vitamin B_{12} by Methanol-utilizing Bacteria, *Pseudomonas* AM-1 and *Microcyclus eburneus*
..... N. Nishio, M. Tanaka, R. Matsuno, and T. Kamikubo...(200)

A Method for Prediction of the Effect of Sterilization on the pH of Culture Media
..... R. D. Cooper and E. I. Kao...(204)

Hyperproduction of Peptidase and Proteinase by Mutants of *Aspergillus oryzae*
..... T. Nakadai and S. Nasuno...(273)

Effect of Vitamin B_6 Compounds in Some Microorganisms Producing Vitamin B_6
..... N. Nishio, T. Suzuki, M. Hayashi, and T. Kamikubo...(277)

Effect of Chlorinated Hydrocarbons (Insecticides) on Fermentation Processes
.....R. Singh, L. Iyengar, and A. V. S. P. Rao...(281)

Production of an Antibiotic by *Streptomyces* sp. a–60
.....K. Ogata, H. Osawa, and Y. Tani...(285)

Streptothricin B Produced by *Streptomyces* sp. NT 1009 as a Single Component
.....Y. Sawada, H. Taniyama, and A. Seino...(290)

Basic Studies on Packed Bed Reactor Using Aminoacylase-pellets
..... K. Hirano, I. Karube, T. Matsunaga, and S. Suzuki...(401)

The Influence of pH on the Growth of *Candida guilliermondii* in Media Containing Diesel Oil as the Main Carbon Source
..... H. Hiss, J. Finguerut, and W. Borzani...(405)

Photocontrol of Trypsin-spiropyran Membrane Activity
.....Y. Nakamoto, I. Karube, S. Terawaki, M. Nishida, and S. Suzuki...(409)

Effect of Carbopol on Oxygen Transfer into Mold Pellets
..... H. Elmayergi and H. Branjon...(414)

Selection of Cell Surface Mutants of *Hansenula miso* IFO 0146 with Aniline Blue
..... K. Osumi, A. Amemura, and T. Harada...(544)

Production of Cellulase from *Pellicularia filamentosa*
..... S. Mizukoshi, H. Sugi, H. Mori, and M. Ichihashi...(548)

Production of Flavin Adenine Dinucleotide by Methanol-utilizing Yeasts
.....S. Shimizu, M. Ishida, Y. Tani, and K. Ogata...(630)

Letter to the Editor

Methylomonas methanolovorans AMANO, SAWADA, TAKADA and TERUI, nom. nov. .....(295)

Subject Index

A

Acetate, algal production from, 369
N-Acetyl-L-glutamine, conversion of L-glutamic acid fermentation into, 224
N-Acetylmuramidase, *Bacillus* lytic enzyme, 485
Acrylamide, inactivation of enzymes during polymerization of, 63
Actinoplanetes, ecology of, 423
Activated sludge, effect of sodium bentonite and $FeCl_3$, 258
———————, performance of, 621
Activated sludge process, in combination with chemical coagulation, 249
Affinity chromatography, of *Lactobacillus* phosphofructokinase, 570
Alcaligenes sp., degradation of ether-alcohol compounds by, 553
Alcohol dehydrogenase, from *Alcaligenes* sp., 553
n-Alkane, substrate for D-amino acid oxidase production by yeast, 13
Amino acids, aromatic, production by *Methylomonas methanolophila*, 466
———————, formation by methanol-utilizing bacteria, 444
Amino acid analogues, resistant mutant in *Methylomonas methanolophila*, 466
D-Amino acid oxidase, from *n*-alkane utilizable yeasts, 13
Aminoacylase-pellets, packed bed reactor of, 401
S-(2-Aminoethyl)-L-cystein, resistant mutant of *Saccharomyces cerevisiae* to, 189
β-Amylase, and sporulation in *Bacillus cereus*, 110
———————, production by *Bacillus cereus*, 103
———————, production by fed-batch culture of *Bacillus megaterium*, 233
Amyloglucosidase, potent mutant for production of, in *Aspergillus awamori*, 193
Analog-resistant mutant of *Methylomonas aminofaciens*, valine and leucine formation by, 452
Aniline blue, selective agent for cell surface mutants in yeast, 544
Antibiotic, acid-base-indication, produced by *Streptomyces* sp., 285
Antibiotic effluent, treatment by photosynthetic bacteria, 326
Aromatic amino acids, production by *Methylomonas methanolophila*, 466
Arylsulfatase, three forms of, 476
Aspergillus awamori, high amyloglucosidase mutant in, 193
Aspergillus sp., arylsulfatases in, 476

B

Bacillus cereus, β-amylase production and filamentation of, 103
———————, β-amylase production and sporulation of, 110
Bacillus licheniformis, UDPG glucose dehydrogenase from, 501
Bacillus megaterium, β-amylase production by fed-batch culture of, 233
Bacillus sp., bacteriolytic enzyme from, 485
Backflow coefficient, effect of viscosity in multistage tower fermentor, 166
Bacteria, from activated sludge, 621
———————, polyethylene glycol-assimilable by, 429
Bacteriolytic enzyme, from *Bacillus* sp., 485
Bifidobacterium bifidum, galactokinase from, 19
———————, sugar nucleotide pyrophosphorylase activities in, 122, 130
Biodegradation, of polypropylene glycol, 89
Biomass, from methanol, 436
———————, *Methylomonas clara* from methanol, 609
———————, *Torulopsis ernobii* from methanol, 581
Biomass production, by *Candida utilis* from nopal fruit, 50, 56
———————, by *Chlorella regularis* from acetate, 369
Blue dextran-Sepharose, affinity chromatography on, 570
BOD, rapid estimation of, 243
Brevibacterium lactofermentam, L-valine fermentation by, 364

Bubble diameter, measurement of, 525
n-Butyl alcohol, effect on the deltamycin X production, 347

C

Candida citrica n. sp., production of citric acid from *n*-paraffins by, 356
Candida guilliermondii, growth on diesel oil medium, 405
Candida lipolytica, cytochrome system of, 84
Candida rugosa, hydrocarbon fermentation by, 76
Candida tropicalis, D-amino acid oxidase production, 13
Candida utilis, biomass from nopal fruit, 50, 56
Carbohydrate, in waste-water, contact biooxidation using fixed bed, 265
Carbopol, effect on oxygen transfer into mold pellets, 414
Carboxymethyl cellulose saccharifying activity of cellulase, 137
Catabolite repression, in β-amylase production by *Bacillus megaterium*, 233
Cellulase, from *Pellicularia filamentosa*, 137
———, production by *Pellicularia filamentosa*, 548
Cephalosporin, production by fungi, 27
Chemical coagulation, in combination with activated sludge process, 249
Chemostat, growth of *Klebisiella aerogenes* in 213
Chlorella regularis, growth yields of, in acetate, 369
Chlorinated hydrocarbons, inhibition of fermentation, 281
Citric acid, production from *n*-paraffins, 356
Cl^-, promotive effect on *N*-acetylglutamine production by *Corynebacterium glutamicum*, 224
Contact biooxidation, of waste-water using fixed bed, 265
Continuous culture, of *Chlorella regularis* underdark-heterotrophic condition, 369
———, of photosynthetic bacteria, 297, 311, 326
Continuous reactor, for inversion of sucrose, 516
Corynebacterium cholesterolicum, 3β-hydroxysteroid oxidase, 337
Corynebacterium glutamicum, *N*-acetyl-L-glutamine and L-glutamine production, 224
Corynebacterium sp., degradation of water-insoluble polymer by, 89
———, metabolic pathway of phthalate in, 97
Cupric sulfate, effect on the citric acid production by *Candida*, 356
Cyanide, conversion to thiocyanate by *Streptomyces* sp., 560
Cysteine, effect on cephalosporin production by fungi, 27
Cytochrome, in mitochondria of *Candida lipolytica*, 84

D

Deacyldeltamycin, fermentative production of, 347
DEAE-Sephadex, naringinase complex, 493
Deltamycin, fermentative production of, 347
Diesel oil, growth of *Candida guilliermondii* on medium containing, 405
Dimethylnitrosamine, formation in polluted environments, 615
Dithiothreitol, protection of galactokinase from heating, 19
Dyeing waste-water, treatment by chemical coagulation and activated sludge process, 249
Dynamic method, for k_La of oxygen in three phase system, 76

E

Enterobacter cloacae, semi-batch culture with constant feed of glycerol, 380
Escherichia coli, vitamine B_6 biosynthesis in, 277
Ether-alcohol dehydrogenase, from *Alcaligenes* sp., 553

F

Facultative methylotroph, *Pseudomonas putida*, 436
FAD, production by methanol-utilizing yeasts, 630
$FeCl_3$, effect on activated sludge, 258
Fed-batch culture, monitoring by fluorescence of NADH, 599

Fed-batch culture, of *Bacillus megaterium* for production of β-amylase, 233
————————, optimization technique, 587
————————, with constant feed of glycerol, 380
————————, with constant feed of substrate, 156
————————, with pH stat, of methanol-utilizing bacteria, 151, 200
Fermentor, multistage tower type, 166
Filamentation, in *Bacillus cereus*, 103
Filterpaper, degradating activity, by *Pellicularia filamentosa*, 548
Fixed bed, treatment of waste-water with, 265
Flavobacterium sp., degradation of polyethylene glycol by, 429
————————, vitamine B_6 biosynthesis in, 277
Flocculation, of bacteria with sodium bentonite, 174, 181
Flora, yeasts, in grape musts, 417
Fluorescence, of NADH, for monitoring fermentations, 599

G

Galactokinase, from *Bifidobacterium bifidum*, 19
Galactose metabolism, in *Bifidobacterium bifidum*, 122
β-Galactosidase, immobilization, of *Macrophomina phaseoli* and *Sclerotium tuliparum*, 575
Gas absorption, from free liquid surface, 388
Glass beads, immobilization of β-galactosidase on, 575
Gluconic acid fermentation, temperature dependent hysteresis oscillation of, 143
Glucose-6-phosphate dehydrogenase, immobilization with polyacrylamide gel, 63
Glutamic acid fermentation, conversion to *N*-acetylglutamine fermentation, 224
Grape musts, yeast flora of, 417
Growth yield, of *Candida utilis*, 56
————————, of *Chlorella regularis* in acetate, 369
————————, of tobacco cells, 207

H

Hansenula miso, cell surface mutants of, 544
Hemicellulolytic enzymes, effect on mesophilic methane fermentation, 143
Hexokinase, immobilization with polyacrylamide gel, 63
Homothallism, and tetraploid breeding in yeast, 1
Hydrocarbon, fermentation by *Candida rugosa*, 76
3-Hydroxyphthalic acid, formation of, 97
3β-Hydroxysteroid oxidase, from *Corynebacterium cholesterolicum*, 337
Hyperproduction, of peptidase and proteinase, 273
Hysteresis, oscillatory, in the gluconic acid fermentation, 143

I

Immobilization of β-galactosidase, preparation and properties, 575
Immobilized aminoacylase, production of L-methionine, 401
Immobilized cells, estimation of BOD by, 243
Immobilized enzyme, by photo-crosslinkable resin oligomer, 71
————————, with protective reagents, 63
Immobilized naringinase, preparation and properties of, 493
Immobilized trypsine, photocontrol of activity, 409
Insecticides, inhibition of fermentation, 281
Invert sugar, continuous enzymatic production of, 516
Invertase, application for continuous inversion of sucrose, 516
————————, immobilization by photo-crosslinkable resin, 71
Isophthalic acid, utilization of, 97

K

KCl, effect on β-amylase production and filamentation in *Bacillus cereus*, 103
Klebsiella aerogenes, chemostat culture of, 213
Klebsiella sp., fed-batch culture of, with methanol, 151

Klebsiella sp., mixed culture with photosynthetic bacteria, 311
Kloeckera sp., production of FAD by, 630

L

Lactobacillus plantarum, phosphofructokinase of, 570
Lactobacillus sp., phosphofructokinase, affinity chromatography of, 570
Leloir pathway enzymes, in *Bifidobacterium bifidum*, 122
L-Leucine, effect on the deltamycin A_4 production, 347
————, formation by methanol-utilizing bacteria, 444, 452
L-Lysine, excretion by analog resistant mutant of *Saccharomyces cerevisiae*, 189

M

Macrophomina phaseoli, immobilized β-galactosidase from, 575
Magnesium ions, promotive effect on bacterial flocculation with sodium bentonite, 174, 181
L-Malic acid, from acetate, propionate and ethanol by *Paecilomyces varioti*, 196
Mass transfer, in tubular contactor, 532
Mating type, in *Saccharomyces cerevisiae*, interconversion of, 1
Maximization, of yield in fed-batch culture, 587
Maximum principle, as optimization for fed-batch culture, 587
Medium optimization, for biomass production, 50
Medium sterilization, effect on pH, prediction of pH for, 204
Methane fermentation, with soybean seed coat or from hydrogen and carbon dioxide, 114
Methanol, a new species of bacterium utilizing, 459
————, amino acid formation from, 444
————, assimilation of, in a fed-batch culture with pH stat, 151, 200
————, biomass production by *Torulopsis ernobii* from, 581
————, production of vitamin B_{12} from, 200
Methanol, utilization by *Methylomonas clara*, 609
————, utilization by *Pseudomonas putida*, 436
————, utilization by yeasts, production of FAD by, 630
Methanol-utilizing bacterium *Pseudomonas putida*, 436
Methionine, effect on cephalosporin production by fungi, 27
S-Methylcysteine, effect on cephalosporin production by fungi, 27
Methylomonas aminofaciens, amino acid formation by, 444, 452
————, valine and leucine formation by, 452
Methylomonas clara, methanol utilization by, 609
Methylomonas methanolophila, a new methanol-utilizing bacteria, 459
————, production of aromatic amino acids by, 466
Microbial film, for tubular contactor, 532
Microcyclus eburneus, vitamin B_{12} production from methanol, 200
Microcrystalline cellulose, saccharifying activity, of cellurose, 137
Minerals, requirement by tobacco cells, 207
Mitochondria, cytochromes in, of *Candida lipolytica*, 84
Mixed culture, of *Rhodopseudomonas capsulata* and *Klebsiella* sp., 311
Mold wheat bran, arylsulfatase production by, 476
Molybdate, effects on arylsulfatases in *Aspergillus* sp., 476
Monitoring, of fermentation by culture fluorescence, 599
Musts, grape, yeast flora of, 417
————, proteins in, 510
Mutant, cell surface, in yeast, 544
Mutant, hyper, of *Aspergillus oryzae*, 273

N

NADH, fluorescence by, 599
————, reoxidation, coupled with UDP glucose dehydrogenation, 501
Naringin, hydrolysis of, by immobilized naringinase, 493

Naringinase, immobilization of, 493
Natsudaidai juice, enzymatic removal of bitterness, 493
Nopal fruit, biomass production from, 50

O

Optimization technique, for fed-batch culture, 587
Oxygen balance, for growth of *Candida utilis* from nopal fruit, 56
Oxygen electrode, rapid estimation of BOD, 243
Oxygen tension, on the L-valine fermentation, 364
Oxygen transfer, effect of Carbopol, 414
————, in hydrocarbon fermentation, 76
Oxygen transfer rate, effect of viscosity in multistage tower fermentor, 166

P

Packed bed reactor, of aminoacylase, 401
Paecilomyces varioti, L-malic acid production by, 196
n-Paraffin, citric acid production by *Candida citrica* n. sp., 356
Pellicularia filamentosa, cellulase from, 137
————, cellulase production by, 548
Penicillium spiculisporum, accumulation of open-ring acid of spiculisporic acid by, 37, 43
Peptidase, hyperproduction, of, 273
pH, effect of medium sterilization on, 204
—, on the growth of *Candida guilliermondii* in diesel oil medium, 405
Phosphofructokinase, in *Lactobacillus plantarum*, affinity chromatography of, 570
————, of *Lactobacillus*, affinity chromatography of, 570
Photo-crosslinkable resin, immobilization of invertase by, 71
Photosynthetic bacteria, metabolism of dimethylnitrosamine, 615
————, waste treatment by, 297, 311, 326
Phthalic acid, utilization of, 97
Pollen bait technique, for isolation of *Actinoplanes*, 423
Polyacrylamide gel, BOD estimation with immobilized cells in, 243
Polyethyleneglycol, degradation by *Alcaligenes* sp., 553
————, utilization by bacteria, 429
Polymer, water-insoluble, bacterial degradation of, 89
Potassium chloride, effect on β-amylase production and filamentation in *Bacillus cerius*, 103
Proteinase, hyperproduction of, 273
Proteins, in musts and wines from Japanese grape, 510
Protocatechuic acid, formation of, 97
Pseudomonas ovalis, temperature dependent oscillations of gluconic acid fermentation in, 143
Pseudomonas putida, growth on methanol, 436
Pseudomonas sp., degradation of polyethylene glycol by, 429
————, fed-batch culture of, with methanol, 151
————, vitamin B_{12} production from methanol, 200
Pyridoxal phosphate, accumulation in bacterial cells, 277
Pyrophosphorylase, in *Bifidobacterium bifidum*, 122, 130

R

Resin, photo-crosslinkable, immobilization of invertase by, 71
Respiratory quotient, of bacteria in chemostat, 213
Rhodanese, in *Streptomyces* sp., 560
Rhodopseudomonas capsulata, waste treatment by, 297, 311, 326

S

Saccharomyces cerevisiae, lysine excretion by analog resistant mutant of, 189
————, tetraploid breeding in, 1
Scale up, for biomass production, 609
Sclerotium tuliparum, immobilized β-galactosidase from, 575
SCP, *Methylomonas clara* from methanol, 609

SCP, *Torulopsis ernobii* from methanol, 581
Semi-batch culture, with constant feed of glycerol, 380
——, with constant feed of substrate, 156
Sewage treatment plant, for hotels in Tehran, 621
Single cell protein, from methanol, 436
Sodium bentonite, bacterial flocculation with, 174, 181
————————, effect on activated sludge, 258
Soil, distribution of *Actinoplanes* in, 423
Soybean seed coat, a fermentative source for methane, 114
Soy sauce, use of enzyme for making of, 273
Spiculisporic acid, open-ring acid of, 37, 43
Spiropyran-trypsin membrane, photocontrol of activity, 409
Sporosarcina ureae, flocculation with sodium bentonite, 181
Sporulation, of *Bacillus cereus* and β-amylase production, 110
Sterilization, effect on medium pH, 204
Streptomyces sp., an antibiotic production by, 285 , 290
————————, cyanide to thiocyanate by, 560
————————, streptothricin production by, 290
Streptothricin B, from *Streptomyces* sp., 290
Suboptimal policy, in optimization for fed-batch culture, 587
Sucrose, continuous inversion of, 516
Sugar nucleotides, pyrophosphorylase towards in *Bifidobacterium bifidum*, 122, 130
Sulfhydryl group, interaction with acrylamide monomer, 63
Sulfur, metabolism of, and cepharosporin biosynthesis, 27

T

Terephthalic acid, utilization of, 97
Tetraploid, in *Saccharomyces cerevisiae*, breeding of, 1
Thiocyanate, from cyanide by *Streptomyces* sp., 560
Thiosulfate oxidase, in *Streptomyces* sp., 560
Tissue culture, of tobacco, 207
Tobacco cells, medium optimization for, 207
Torulopsis ernobii, growth on methanol, 581
Tower fermentor, multistage, 166
Triton X-100, inhibition of 3β-hydroxysteroid oxydase activity, 377
Trypsin, immobilized, photocontrol of activity, 409
Trypsin-spiropyran membrane, photocontrol of activity, 409
Tubular contactor, mass transfer in liquid phase of, 532

U

UDP-galactose pyrophosphorylase, in *Bifidobacterium bifidum*, activity of, 122
UDP-glucose and UDP-galactose, pyrophosphorylase from *Bifidobacterium bifidum*, 130
Uridine diphosphate glucose dehydrogenase from *Bacillus licheniformis*, 501
Uridine diphosphate glucuronic acid, preparation by bacterial enzyme, 501

V

L-Valine fermentation, by *Brevibacterium lactofermentum*, 364
L-Valine, formation by methanol-utilizing bacteria, 444, 452
Viscosity, effect on backflow and oxygen transfer in multistage tower fermentor, 166
Vitamin B_6, biosynthesis of, 277
Vitamin B_{12}, production of, by a fed-batch culture with pH stat, 151, 200

W

Waste treatment, by *Rhodopseudomonas capsulata*, 297, 311, 326
Waste-water, contact biooxidation of, using fixed bed, 265
————————, rapid estimation of BOD, 243
Wine, proteins in, 510
Wool scour effluent, treatment by photosynthetic bacteria, 326

Y

Yeast, biomass from nopal fruit, 50, 56
——, cell surface mutants, of, 544
——, cytochrome system of, 84

Yeast, growth on diesel oil, 405
——, growth on methanol, 581
——, lysine excretion by analog resistant mutant of, 189
——, production of D-amino acid oxidase, 13
——, production of citric acid from *n*-paraffins by, 356
Yeast, production of FAD by, 630
——, species in grape musts, 417
——, tetraploid breeding in, 1

Z

Zn^{++}, inhibitory effect on *N*-acetylglutamine production by *Corynebacterium glutamicum*, 224
